2013 Alumni Survey

The 2013 Alumni Survey was administered to Cornell alumni of the class of 2002. The office of Alumni Affairs identified 3,034 alumni from the class of 2002; 2,777 had valid email addresses. The survey was administered via the web, and the first email invitation was sent on April 16th. Email reminders were sent to non-respondents on April 24th and May 3rd. The survey closed May 31st. There were a total of 392 responses to the Alumni Survey, for a total response rate of about 14%.

The results of the 2013 Alumni Survey are displayed in the tables that follow. It may be most useful to refer to the survey questionnaire first in order to identify questions of interest.

In the tables below, the first row presents the distribution of responses for a given question among all responding Cornell alumni.

The 2013 Alumni Survey was also administered at a number of other private, highly selective, research universities. Responses from the alumni at those institutions are grouped together into "Other Ivies" (an aggregation of other Ivy League universities) and "Other Universities" (an aggregation of some non-Ivy universities).

The next panel of each table presents the distribution of responses to a given question for two groups distinguished by responses to a survey question about prior giving: "Which of the following statements best describes your financial contributions to your undergraduate institution?" Cornell alumni are classified as "Not a donor" and "Donor" on that basis.

Similarly, respondents were asked "Today, how connected do you feel to your undergraduate institution?" In the following tables, Cornell respondents who responded "Not very connected" are distinguished from respondents who responded as at least "Somewhat connected."

Finally, the distribution of responses for each item is shown by undergraduate college.
