

## **2011 Cornell New Student Survey**

The Cornell New Student Survey asks incoming first-year students about their high school activities; personal goals and abilities; and expectations of their college experience.

The Cornell New Student Survey was administered for the first time during July and August of 2011. The survey was administered via the web to all incoming first-year students. A total of 2,345 students responded to the survey.

The results of the 2011 Cornell New Student Survey are displayed in the tables that follow. It may be most useful to refer to the survey instrument first in order to locate questions of interest. Then, the corresponding tables can be found using the bookmarks (by clicking on the bookmark image  to the left) or by using the search function within Adobe Acrobat Reader.

On the first line of each table, the responses for the applicable question on the survey are presented for Cornell University as a whole. Frequencies are also presented by race/ethnicity, gender and undergraduate college.

Thinking of your high school graduating class, about how many students went on to a 4-year college or university?

Row percentages within...		Only a few	Less than		Most	All or nearly		Don't know	Not applicable (e.g., homeschool)
			half	About half		all
